Author. Surgeon. Speaker

Dr. Mark is a highly sought-after speaker with more than 160 public speaking events under his belt. He leverages his experience as a surgeon in the world's poorest countries, as a specialist in decision-making, and as a career coach in his talks.

A reluctant doctor who tried to leave medical school, Mark discovered the compelling power of purpose in his work and shares his process with students and clients. From being held at gunpoint and fleeing a civil war as a child, to working in countries right at the end of their own civil wars, he is dedicated to the idea that the only way out of an irascibly self-centered existence is to create a life in the service of others.

Mark is the author of *Solving for Why* and a former science nerd turned 3x American Ninja Warrior competitor.
